

HOMEPAGE IDENTITY · BUSINESS CARD DIRECTION

A five-star first impression.

The visual language of the redesigned 5star.photos homepage, translated into a practical designer handoff.

Actual homepage imagery. Real property photography is the proof—not decorative stock art.

Luminous

A violet atmosphere, a quiet dark base and a focused magenta accent.

Confident

Bold Montserrat headlines. Clear, direct language. Plenty of breathing room.

Polished

The current glossy badge, soft glass surfaces and rounded photographic frames.

This guide documents the current website. Business card layouts, clear space and print sizes are **recommended applications**, not existing printer-approved artwork.

The homepage identity.

The homepage header pairs the glossy “5” badge with a white, bold Montserrat wordmark. That is the identity to carry onto the card.

Logo handling

- Use the included badge, copied from the homepage’s **logo.png**.
- Wordmark: Montserrat 700. Lowercase; retain the dot.
- Keep native proportions. Do not stretch, recolor or retrace.
- Recommended clear space: half the badge height on all sides.

Montserrat, throughout

Regular 400 · supporting copy
Medium 500 · small labels
Semibold 600 · subheads
Bold 700 · identity & titles
ExtraBold 800 · optional

All five weights are loaded by the site. Use 400, 600 and 700 for a restrained print hierarchy.

Element	Website reference	Business card recommendation
Headline / name	36–60 px · 700	14–18 pt · 700
Wordmark	20–24 px · 700	14–18 pt · 700
Body / contact	14–24 px · 400	9–10 pt · 400 or 500
Line height	Body approximately 1.5–1.625	Contact text 1.4–1.5

Do not use the older shutter/star logos. “5star-logo-horizontal.png” and “5star-logo-stacked.png” are not the redesigned header identity. They are excluded from this kit.

Violet leads. Magenta gets attention.

Use the violet brand backdrop for a homepage-matched card. Blue and teal belong to supporting elements and other app sections—not a rainbow across the whole card.

Core brand tokens

**Magenta**

#FF3EDB
255, 62, 219

**Violet**

#6A1FBF
106, 31, 191

**Deep purple**

#3B0E7A
59, 14, 122

**Electric blue**

#2F7BFF
47, 123, 255

**Teal aqua**

#16B2A5
22, 178, 165

The homepage backdrop uses these three tones

**Glow · top left**

#9B3BE0

**Base · mid-tone**

#2C0F66

**Deep · shadow**

#0D0620

These are the route-driven background values—not the core violet and deep-purple swatches above. Match the actual backdrop recipe on the next page.

Supporting neutrals

**Near black**

#05030A

**Dark slate**

#12101E

**Mid slate**

#2B2A3A

**Soft grey**

#C9CCDA

**Off white**

#F5F5FB

Keep utility colors secondary

Amber #FFB341 is the star/credit token. Success #27D980 and error #FF4B6B communicate status. None is required on your card.

A small homepage distinction

The headline uses Tailwind amber-400, a brighter gold (**approximately #FFB900 in sRGB**), not the #FFB341 token. Header text uses pure white #FFFFFF.

Depth, without clutter.

A brighter upper-left corner fades into a deep violet field. Frosted panels soften the content; magenta-to-violet pills mark the primary action.

PRIMARY ACTION

Enhance My Photos

Glass surface

White at 10% opacity.
White border at 15%.
Soft shadow; rounded corners.

Action recipe

135° linear gradient
#FF3EDB → #6A1FBF
Fully rounded ends; bold white type.

The web glow uses magenta at 50% / 30% with
40 px / 80 px blur. Soften or omit it in print.

Shape & spacing

Homepage feature cards: 24 px radius and 32 px
padding. Photos: 12–16 px radius. Hero CTA: 48 px
horizontal / 24 px vertical padding.

These are screen values; translate their
proportions rather than copying pixels to paper.

Homepage backdrop — exact CSS recipe

```
radial-gradient(115% 85% at 18% 8%, #9B3BE0 0%, transparent 62%),  
radial-gradient(80% 70% at 88% 92%,  
  color-mix(in oklab, #2C0F66 70%, black) 0%, transparent 65%),  
linear-gradient(170deg, #2C0F66 0%, #0D0620 100%);
```

Section family	Glow / base / deep	Use
Brand · violet	#9B3BE0 / #2C0F66 / #0D0620	Homepage, pricing, auth
Library · blue	#2F7BFF / #13327F / #060C24	Photo tools
Account · teal	#16B2A5 / #0B5C58 / #041D1C	Account, history, checkout
Admin · graphite	#6B7590 / #2A2F42 / #0A0C14	Administration

Small card. Same first impression.

Keep the front focused on recognition and the back focused on contact. These concepts use the current identity—not an alternate logo or a new color system.

FRONT · BRAND

Current badge + white Montserrat wordmark.

Homepage violet atmosphere. One short message. One magenta accent.

Suggested tagline, not a verified performance claim.

BACK · CONTACT

Dark violet #0D0620 with a slim magenta accent.

Name 16 pt / 700.

Contact 9 pt / 400–500.

Bracketed fields are placeholders. Replace before ordering.

Size shown: 3.5 × 2 in at 100% on a US Letter page. This guide shows trim-size concepts only; it does not include a printer's bleed, crop marks or a CMYK output profile. Do not send these page images directly to print.

Prefer a QR code?

Replace secondary content rather than squeezing it in. Use a dark code on a light quiet zone, around 0.8 in / 20 mm or larger, then test the final printed proof on a phone.

Keep the card quiet

No testimonial blocks, tiny photos, credit icons or multicolor section swatches. Let the badge, name and violet field do the work.

From screen to stock.

Neon screen color, glow and glass do not reproduce exactly in ink. Treat the RGB values as the visual target, then proof the conversion with your printer.

Finished size	3.5 × 2 in / 88.9 × 50.8 mm (US). Confirm the printer's template.
Bleed	Typically 0.125 in / 3.175 mm per edge. Document: 3.75 × 2.25 in. Extend the background fully.
Safe area	Minimum 0.125 in inside trim; 0.1875–0.25 in preferred. Concepts use 0.2 in.
Resolution	300 ppi at final size for images; retain vector text. Do not print from a screenshot.
Color & PDF	Printer-supplied ICC profile. PDF/X-4 if accepted, with fonts embedded and the requested output intent.
Stock & finish	Suggested: 16–18 pt matte or soft-touch. Optional spot UV on the badge; proof on actual stock.

Included in the asset ZIP

- Six-page brand guide PDF.
- [Current badge PNG](#).
- [Montserrat TTF](#) + [font license](#).
- [RGB tokens and gradients](#).
- Editable guide and card concepts.
- Homepage before/after images.

Final proof checklist

- ☐ Correct badge, name, phone and email.
- ☐ Fonts embedded or outlined in a delivery copy.
- ☐ Bleed and safe area match the printer template.
- ☐ Dark areas readable; colors approved on stock.
- ☐ QR tested at printed size, if used.

Raster badge, not a vector master. Inspect a 100% proof at card scale. Request original artwork for large-format use; do not auto-trace the glossy mark.
